Fanatic Air Duct Cleaning Solutions
Indoor Air Contamination The "Sick Building Syndrome"

A substantial percentage of building occupants complain of symptoms associated with acute discomfort, such as: headache, eye, nose, or throat irritation, dry cough, dry or itchy skin, dizziness, and nausea, difficulty in concentrating, fatigue and sensitivity to odors and more. These symptoms occur in the home as well.

Most of the complaints report relief upon leaving the building or home. The cause of the symptoms is unknown. However, studies show that indoor air pollutants may cause such symptoms. Today's air conditioning and heating duct systems is where the pollutants (dusts, mold, fungi, pollen, bacteria, animal dander, etc.) continue to accumulate. Every time the system is on, these pollutants are blown out into the air inside the home or building.

To help remedy the problem, "Fanatic" has devised a service to clean, decontaminate and control the air duct system.

Fanatic's qualified service technicians will remove all supply air registers, thoroughly clean and decontaminate them, clean the

furnace or air handler, return the air duct or chamber, and all supply ducting with a "HEPA" (High-Efficiency Particulate Air) vacuum unit. Fanatic then fogs through the entire system with oxine; a safe and non-toxic EPA registered sanitizer. Fanatic will also replace all registers.

After the cleaning procedure, Fanatic's service technicians will clean up, leaving you with no residuals from the service performed. For further information and a free estimate, call 1-866-266-1068 for a healthier indoors environment.

**AIR DUCT CLEANING
